v4.6

ELLIANCE

Sitemaps & wireframes are a high-level schematic representation of content distribution on a website. They are primarily intended to represent major organizational themes across a site

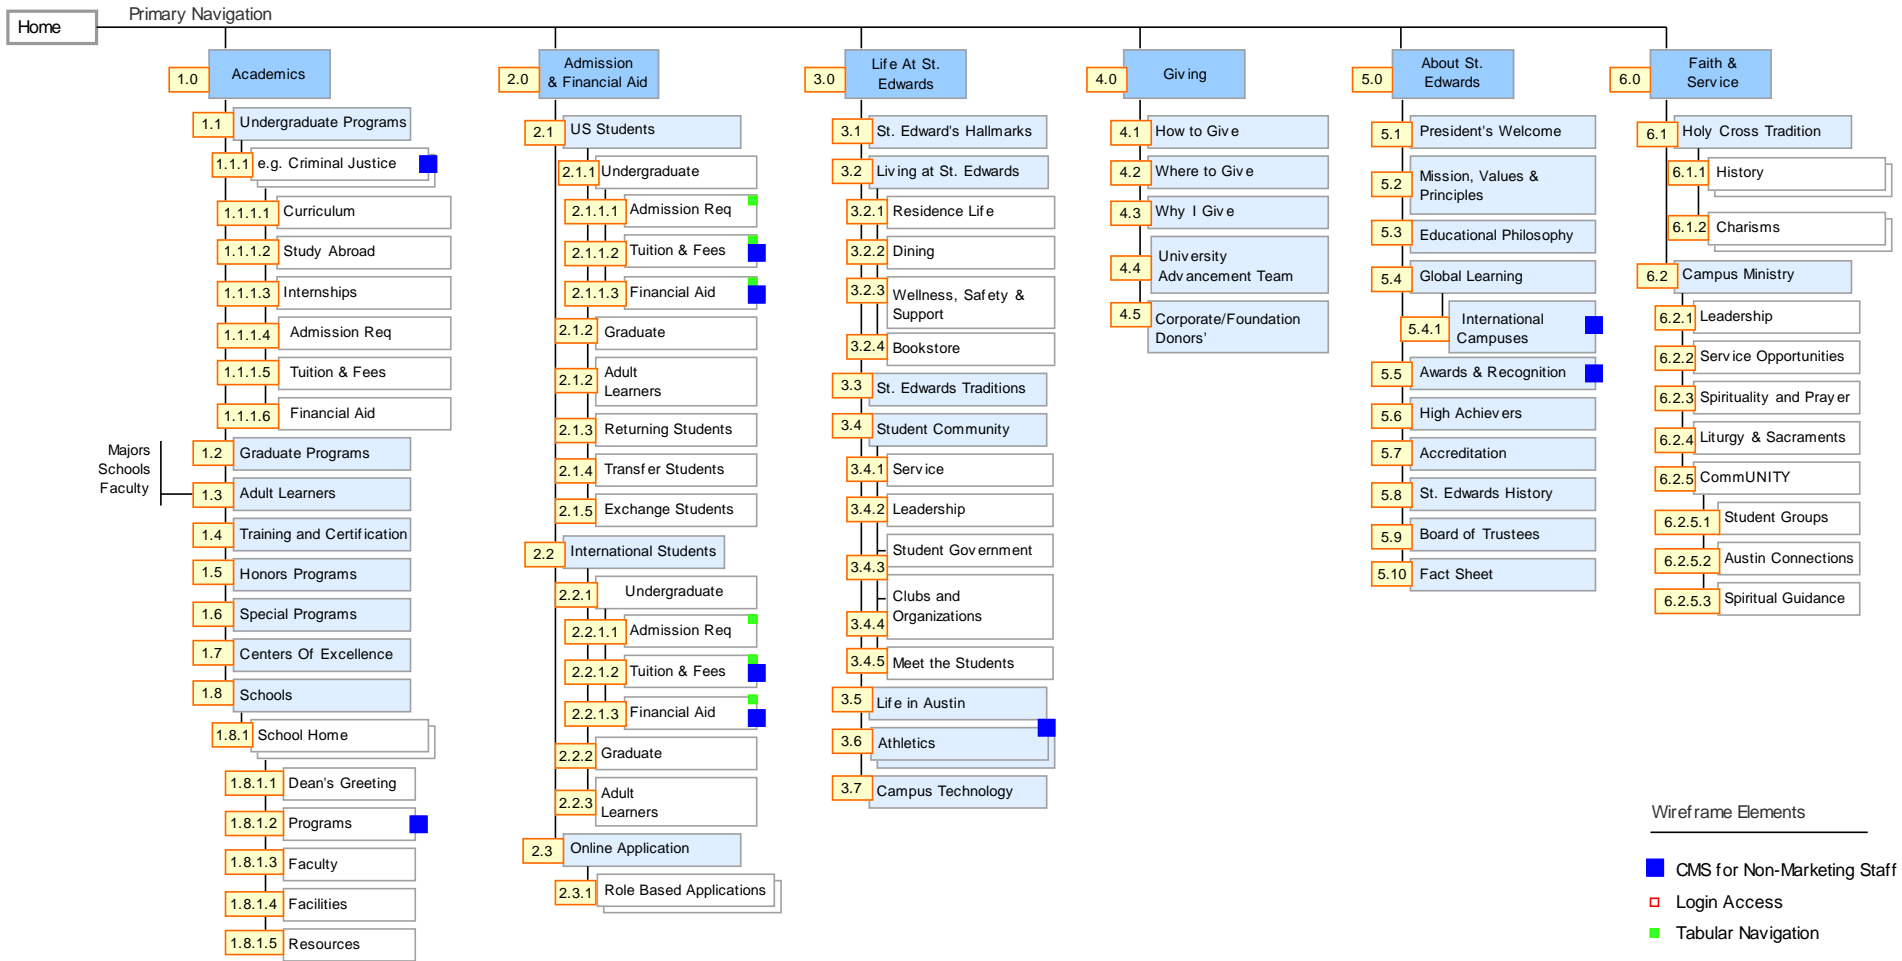

St. Edward's

www.stedwards.edu - Information Architecture

A blueprint is a high-level schematic representation of content distribution on a website. While blueprints appear suggestive of site-flow experience and do address essential site navigation, they are primarily intended to represent major organizational themes across a site
